

Students and their families will receive their first three books and a Parent Guide to learn how the program works. Your child can receive up to 6 more FREE BOOKS over the summer. And, they can keep them forever!

Every book has a **Discovery Sheet** on the inside front cover. This sheet contains 4 questions designed to build reading comprehension. The Discovery Sheet also contains a **unique 3-digit book code and instructions for parents on how to report that a book has been read**. Every time a book is reported, Kids Read Now mails the next book on the student's Wish List directly to the student's home. Kids Read Now sends weekly reminders to parents to report books.

What You Need to Know

1. Read a book
2. Answer the Discovery Sheet questions
3. Respond to KRN's weekly call, text, or go online to report the book code to get your next book
4. Report all 9 books for your student to get a prize

Students who participate in **Kids Read Now** gain reading skills over summer! This means less re-teaching in the fall! On average we find that:

- For each book a student read, they increased their reading score by 0.1 months of schooling.
- Students who participated previously in KRN scored about 1.4 months higher than their counterparts in fall testing.

Parents can download the **Kids Read Now app (free)** and there is a **Kids Read Now Parent Portal** to assist parents all summer:
